List of synonyms and antonyms

A Billion Photos/ShutterstockTezaurus is a very handy tool: if you're mysterious about a word that expresses your exact meaning, or are really trying to avoid using a common word, the thesaurus will give you an instant list of options. But while many words in a thesaurus can be plausibly immersed in each other, they often don't have exactly the same thing. Here are a few familiar pairs of words that you might think have the same meaning, but not quite. In addition, find out that synonyms (and antonyms) people search the most. Nicole Fornabaio /Rd.comHere is an example of two words that overlap in some ways, but are not synonymous at all: Both persistent and stubborn describe the condition of the immovable. While the persistent has a positive connotation (someone who is persistent, stable and reliable), stubborn means negative judgment (stubbornness means a certain level of ignorance along with permanence). According to these grammatical rules, you will immediately sound smarter. Nicole Fornabaio /Rd.com Some people say blunt when they mean abstrus, and that's unfortunate, because blunt is an insult: it means blunt. Abstruse, on the other hand, refers to something that is generally difficult to understand. In other words, just because you're having trouble understanding the abstruse concept doesn't mean you're stupid. Nicole Fornabaio /Rd.com While these two cover some of the same foundations (both are adverbs describing actions that are harmful), discriminatory describes an action that is harmful because it unfairly distinguishes between different categories of people or things (such as age, race, religion, or gender). Biased generally describes malicious action. You're following these pairs of words that mix even good spellers. Nicole Fornabaio /Rd.com Who is infertile (having difficulty conception), may or may not be sterile (unable to have a child). But he who is sterile will always be barren. Nicole Fornabaio /Rd.comoid in factoid may mean that the word factoid means a small fact, like a little trifle. However, the oid suffix means something resembling something else. In other words, factoids are only similar to facts. That's not facts at all. In fact, facts are false facts. Here are a few other surprising words that don't mean what you think they're doing. Nicole Fornabaio / Rd.com the problem with the word deceptively is that it is, so to say the least, a little deceptive. In other words, it can mean one thing, just as it is the exact opposite. So while you may be using it correctly, technically your audience may not understand what you're thinking. Still with us? For example, if you describe a house as seemingly small, you may mean that it is the opposite of small, although it may seem small. But the person you're talking to can believe you're saying the house is smaller than it looks. Check out these funny examples of how not to Thesaurus. Nicole Fornabaio /Rd.com Similarly deceptive word belies causes confusion because it has two meanings that mean the opposite of each other. According to the dictionary, belie is a verb that means disguise or gives a false impression. For example, you can use a smile to make fun of your lying eyes, while some people use belies to mean betrayal, as in your eyes they have a grudge under your smile. This second use is so common, so it's hard to know what someone means when writing or saying belies instead of disguises or betrays. When it comes to real synonyms, find out how words are added to the thesaurus. Nicole Fornabaio /Rd.comThis two share a certain overlap, but they are not the same and cannot necessarily be used interchangeably. Your religion refers to your system of faith or worship in a higher power of some kind (usually God or gods). Your ethnicity refers to your culturally defined identity. Here are a few other fashionable words that you hear a lot, but may not know the exact meaning. Nicole Fornabaio /Rd.com The words bisexual and pansexual refer to fluency in sexual preferences. But bisexual is defined as attracted to both men and women. Thus, this word assumes that there are only two sexes. The definition of pansexuals is attracted to both men and women, as well as people who identify as no gender or other sex. Gender identity has led to many of these grammatical rules that have changed over the last decade. Nicole Fornabaio /Rd.comWhen you tell someone you think they're unique, you tell them they're unique – and you can say that thanks to uni at the beginning, which is latin unique. Technically, every person on earth is unique. If you are actually trying to say that this person is important to you - or unusual or fascinating - he is following the word special. Dust off some of these synonyms that will make you a better writer. Nicole Fornabaio /Rd.com If you want something to happen, you can force it, which means using force or pressure. Or you can be more lye, using influence, exhortation or even provocation. In other words, these words overlap, but they don't really sound the same, and you wouldn't want to force something when it did, it would be adequate. Psst... You're probably mispronouncing these 21 common words without knowing it. Nicole Fornabaio /Rd.com In the UK, people who get fired from work are often told they have been made redundant. If you think this word means repetitive, then of course you will scratch your head. The true meaning of superfluous is superfluous or unnecessary. Does that make sense now? If further enlightenment is not superfluous for you, take a look at these examples of phrases that we say all the time that actually contain redundancy. Nicole Fornabaio / Rd.comHere are two different personality traits that are often confused, but it certainly doesn't mean Same. Someone who is ashamed experiences discomfort when meeting new people, but someone who is introverted recharges his personal energy through individual activities such as reading or thinking. What's fascinating is that these 20 words are actually their own antonyms. Nicole Fornabaio /Rd.comWhen people say it's all right and good, their words aren't really superfluous. This is because they cover other soil well and well. Well, he describes actions; good describes things. So you can sing well, but it's even better when the song's good. Fun fact: These fun words will help you improve your vocabulary. Nicole Fornabaio /Rd.com will clear up this confusion once and for all and hopefully pay attention: The word will mean something that needs to be done. In other words, keep in mind that he's having and forcing in the same way. The word will is often used to indicate what needs to be done, it is more correctly used to indicate the prediction of what will happen in the future moment. Nicole Fornabaio /Rd.com sure you had this lecture in elementary school when you asked your teacher: Can I go to the bathroom? She probably replied: Yes, you can. Now ask: Can I go? Use the word can to indicate what is possible, and the word can to indicate what is permissible. Here are some grammatical rules that we think may be virtually extinct in the next decade. Nicole Fornabaio /Rd.comWhen something is outdated, it is outdated or outdated; If it is outdated, it is in the process of outdated or unused. So what's outdated today may be outdated tomorrow. Let us hope that these outdated words will never be outdated. Nicole Fornabaio /Rd.comIn the U.S. justice system, everyone is innocent until proven guilty. But in a courtroom, just because someone isn't found guilty doesn't necessarily mean they're innocent. Acquittal means he hasn't been proven guilty in court. To be innocent is to be blameless. It is entirely possible to be blamed, even if one is acquitted. Find out some confusing words that mean the opposite of what you think. Nicole Fornabaio /Rd.com Just because you're guilty of wrongdoing doesn't mean you're going to be convicted in court, and whoever's convicted may or may not be guilty. In fact, one who has been convicted can continue to plead his innocence. The sentenced word concerns only what the court has decided in relation to the infringement. Nicole Fornabaio /Rd.comIf you do something wrong, should you feel guilty? Or should you be ashamed? According to this study of psychological terms that people are often wrong about, shame is a global negative assessment of one's own behavior, while guilt is a specific negative assessment of the behavior itself. (Like: I did the wrong thing.) That's why, as Pepperdine University professor Steven Sultanoff, PhD, says with shame, you think: I did something wrong, which makes me a bad person, but with You think I did something wrong, but I'm still a good person. Find common grammatical rules that you can safely ignore without feeling guilty. Nicole Fornabaio /Rd.comFriendly refers to friendliness or goodwill among people or groups. Friendly refers to the friendly nature of one person. The group can have a friendly meeting as the people there are friendly. Nicole Fornabaio /Rd.comBoth of these words includes a prediction of future events. But expecting something to happen is not the same as expecting it to happen. When we expect something, it reflects our state of mind. When we expect something, we're already preparing for what we expect to happen. Further improve your language smarts with this list of well-known homophones that people constantly mix. Originally published as January 10, 2020Lauren Cahit for Reader's Digest Digest
